

CARECREDIT IS NOW INTEGRATED WITH CoFi.

Turn CareCredit on in CoFi to help offer a single financing and payment experience for procedures with multi-party fees.

Create better patient experiences: The CareCredit health and wellness credit card helps patients pay for care and CoFi simplifies payment with one, convenient invoice. Together, CareCredit and CoFi make collection and payment easy for you and your patients.

Increase treatment acceptance: Turning CareCredit on in CoFi allows patients to finance their whole procedure—even if the co-providers don't accept CareCredit.

Ensure payments are handled properly: Co-providers receive their respective funds directly, ensuring critical compliance and reducing administrative burden for your team. Plus, it helps patients focus on getting the care you recommend, not on who they have to pay.

How does turning on CareCredit help you streamline payments?

CoFi combines your charge(s) with your co-providers' charge(s) to create one simple invoice. With CareCredit turned on in your CoFi account, patients using CareCredit can finance payment to multiple providers without the confusion of multiple bills.

Turn on CareCredit in your CoFi account today to activate a seamless collection and payment process!
